

# WASTEWATER SYSTEM PERMIT

## Procedure:

- A. The owner/contractor shall submit site plan and detailed drawing of the system along with the application. The site plan shall show structures, the preferred system and its layout including distances from stream, ponds, property lines, water lines, etc.
- B. A soil profile shall be completed by Osage County. No other design shall be accepted by this office unless the applicant has been approved by the County Sanitarian.
- C. Upon reviewing the results of the soil profile, wastewater system options will be given to the homeowner for review.
- D. Approving the application will authorize construction to begin.
- E. For final approval, the Osage County Sanitarian must view the installation after it is in place and before it is covered with soil. The resident shall not occupy the building until the final inspection is approved.

## TYPE OF SYSTEM

Type	Size or Length	Comments (Brands, suppliers)
Concrete septic tank		
Gravel trench lateral field		
Chamber lateral field		
Lagoon		
Aerated system		
Mound		
Other(describe)		

Let it be known that the owner agrees to only install the system approved by Osage County. In the event of failure, such system will require design and reconstruction at the direction of Osage County and in compliance with the Osage County Wastewater Code and the Osage County Land Use Regulations.
